

智慧水稻害蟲監測與誘捕器 Spotch Smart Paddy Field Monitoring & Trapping Device

技術應用設計 材質應用設計 永續設計
Technology Application Design, Material Application Design, Sustainable Design

台灣食安意識提升，有機稻農面臨高勞力需求與經營挑戰。我們推出 Spotch 智慧害蟲監測器，以科技減輕巡田負擔，並以租賃方式降低成本。

裝置結合了 IoT 與 AI，實時監測氣候、土壤及害蟲數據，生成雲端報告。農民可用手機 App 快速掌握田間狀況，模組化功能針對不同害蟲靈活應用。裝置採環保 PETG 材質 FDM 列印製成，外型融入水稻意象，耐用且美觀。

Spotch 減輕農民負擔，推動有機轉型，促進永續與智慧農業發展。

With rising food safety awareness, organic rice farmers face labor and operational challenges. Spotch, a smart paddy field monitoring device, reduces inspection burdens and lowers costs with rentals.

Spotch integrates IoT and AI to monitor climate, soil, and pests, uploading reports to the cloud. Farmers use an app for quick field updates, and its modular design targets pests flexibly. Made with eco-friendly PETG, the durable device blends into rice field aesthetics.

Spotch lightens farmers' workload, supports organic farming, and promotes sustainability in smart agriculture.
